

AI safety monitoring on the cameras you already have.

When a rule is broken: **Warn.** **Escalate.** **Hold.**

Live view: helmet rule broken in a machine bay, voice warning playing in Hindi

Warn.

A voice warning plays at that spot, in the worker's own language. Most unsafe acts stop here.

Escalate.

If it isn't acted on, the shift in-charge gets the snapshot by SMS, Telegram or a call. Every event is logged.

Hold.

Where you choose to allow it, the detection reaches your PLC and the machine is held until the area is clear.

Any hazard gets its own rule.

PPE

Machine zones

Work at height

Vehicles & pedestrians

Stairs & handrails

Blocked exits

Person down

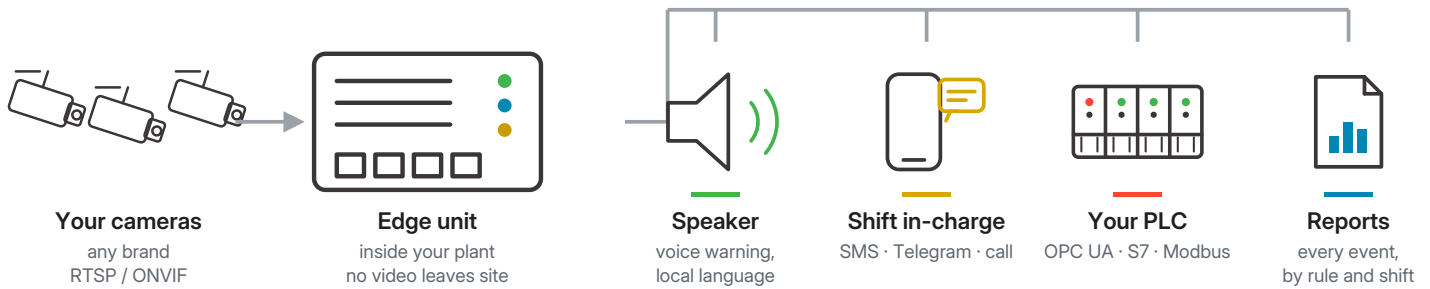

Early smoke

Lone worker

+ Custom

You choose the rules for each camera, and what happens when one is broken: any one of the three, or all of them.

How it connects.

Every event on record.

One event from the system running on our own office staircase: two rules triggered, voice warning played, event logged with a snapshot. Faces are blurred on output.

Event · 21 Aug 2026 · 12:58:59 · Stairwell

Symbiotic office · Stairwell · 21 Aug 2026 12:58 Shift in-charge

VIOLATION – NO HANDRAIL + PHONE ON STAIRS 21-08-2026 12:58:59

RULES ON THIS CAMERA

- Handrail not held** (TRIGGERED)
neither wrist within the rail contact band
- Phone on stairs** (TRIGGERED)
handheld device + raised forearm
- Running on stairs** (off)
stride cadence against tread pitch

WHAT HAPPENED

- Detected on the stairs** (DETECTED)
12:58:59
Both hands off the rail - phone in hand
- Two rules triggered** (VIOLATION)
12:58:59
No handrail + phone on stairs

Built for the plant floor.

Uses your existing cameras

Any make, over RTSP or ONVIF. No new camera network to install.

Speaks the worker's language

Hindi, Bengali, Marathi, or any language you need.

Connects to your PLC

OPC UA, S7 or Modbus. It requests a hold; your PLC decides.

Protects privacy

Faces are blurred on every output. Footage retention is set per camera.

Stays inside your plant

No video leaves the site. An air-gapped unit is available.

Installed by our own engineers

25 years on plant floors. Siemens Authorized System House.

See it on your line.
